```

Sonuç olarak örnekde verilen çıktıya benzer şeyler yapmaya çalışıldı.sistemin güvenli durumda çalışabilmesi için boşta olan kaynak verilen sayılar girildiğinde ilk olarak available 4. Proses karşıladı available=available+allocation 11322 oldu ; sırasıyla 1. Proses karşılandı available 21533 ;proses 3 – 32543 ; Proses 2 -52653 kaynaklar proseslerin istedikleri sırayla çalışmaları için yeterli oldu sistem güvenli durumdadır ölümcül kilitlenme oluşmaz
